Absence of recurrent stroke after percutaneous closure of patent foramen ovale despite residual right-to-left cardiac shunt assessed by transcranial Doppler. [Absence de récurrence d'accident vasculaire cérébral après fermeture percutanée de foramen ovale perméable, malgré la persistance de shunt cardiaque droit-gauche résiduel, objectivé par doppler transcrânien].
Archives of Cardiovascular Disease, 2008;101,435-441.
